

ZYTERGE BASE PW

1. What is unique about ZYTERGE BASE PW?

ZYTERGE BASE PW is a polymeric cleaning agent for denim garments. The product effectively removes and keeps loose fibers, indigo dyes, starch and other impurities in suspension during washing. This results in better cleaning of garment without staining of white pockets and back side of the garment. The product can work effectively even at lower ML ratio compared to other polyacrylic acid base product.

2. What is the test procedure before plant trials?

If you have 100% product then refer dilution procedure from literature and Check

- Appearance
- Colour
- Stability

3. What is the difference between ZYTERGE BASE PW and other anti back staining agent?

ZYTERGE BASE PW being long chain molecules holds released dye and other impurities in very good form and does not allow redepositing on white pockets. While other ethoxylates because of low chain molecules impurities is again redeposit and does not give effective cleaning.

4. What is the special procedure for ZYTERGE BASE PW application?

Refer technical literature for details.

5. What are the application areas?

The product should be used during each stage of washing.

6. Recipe guideline?

Please refer literature or contact **Zydex** / authorized distributors' technical person.
