

ZYC DROP

Mist / Drift Control Agent

Zytonic[®]

**Sustainable farming for nutritious,
safe and affordable food for all**

Mist / Drift Control Agent

- Eliminates misting and improves targeted spray
- Non-toxic and reduces field worker exposure to hazardous chemicals
- Retains wetness/moisture on the plant for a longer period of time and makes pesticide spray more effective
- Decreases spray droplet bounce & is resistant to being washed out during rains

Dose:

- 5-10 ml / 100 liters (high pressure pumps will require higher dose of Zycodrop for effective control on misting)

Application Methodology (Shake well before use)

Prepare two solutions as follows:

- **Solution 1:** Take 15-20 liters of water and add 10-20 ml of Zycodrop while stirring. Wait for 20 mins (minimum).
- **Solution 2:** Mix the recommended dose of Zytonic Active (spreader-adjuvant) with the needed dose of crop care chemicals separately and wait for 20 mins (minimum).
- Mix the above two solutions together add required water and spray.

Note:

- Easy to mix & compatible with most crop care chemicals (except cationic based substances)
- Stable over a broad pH range and water hardness (Extreme hardness above 1,000 ppm to be avoided)

For All Crops

**Available in 250 ml
pack & 2 ml Sachet**

Store in a cool & dry place, away
from direct sunlight & heat
