# ज़ायडेक्स<sup>®</sup> सुरक्षा

## Foliar Protection

**Sustainable farming for nutritious,  
safe and affordable food for all**

### ज़ायडेक्स<sup>®</sup> सुरक्षा

1 kg

- Powder polymer formulation: 100%

### Zytonic<sup>®</sup>Active

150 g

- Polymeric wetting agent: 30%
- Formulation aids and inert: 70%

### ZYC DROP

6 g

- High molecular weight polymer: 30%
- Formulation aids & inert: 70%

### Benefits

- More greenery with less water
- Improved overall plant immunity
- Enhanced and faster growth
- Improved quality & shelf-life of flowers and fruits
- Increase in drought resistance of the crop

### Dose (For 100 liter solution):

- Zydex Suraksha: 1 kg
- Zytonic Active: 150 g
- Zycodrop: 6 g

### Application :

**Step 1:** Dissolve 6 g Zycodrop in 5-10 litres of water and wait for 10 minutes. Start adding balance water to complete 100 liters, add 150 g Zytonic Active followed with 1 kg Zydex Suraksha powder. Mix the solution for few minutes to ensure complete wetting of the powder.

Leave this solution to mature for 12 - 24 hours before spraying best to spray before 10 am or two hours before the sunset.

**Step 2:** Make sure to completely drench the plant while spraying from the top and bottom.
